

At Pure Smiles, our core mission is to provide a positive lasting difference in the lives we touch. As such, we are working diligently to assure the health and safety of our patients as well as our team members. At this time, we would like to provide an update from the Ohio State Dental Board to our patients. It is with an abundance of caution we are recommended to postpone all elective dental surgery and treatment. This will allow our office to prevent risk of inadvertent transmission and preserve inventory of supplies for critical cases.

In the event of a dental emergency or dental pain we will have a small team assembled to treat your urgent dental problem. We ask that you call ahead to our team as we are limiting the number of individuals in our office at one time. For high-risk individuals for COVID-19, those experiencing a fever in the last 24 hours, or who have had contact with someone who is ill, please call and we can arrange a telephone or facetime consultation in the event of an emergent dental issue. Our number one goal is the health and safety of our patients and team. We hope these measures will help to not only ensure this but alleviate the burden of emergent and urgent dental issues from our Hospitals and Emergency Rooms and keep them available to treat the patients in need of emergent health care including those suffering from COVID-19.

We appreciate everyone's understanding and cooperation in these times of uncertainty. We believe that if we all play our individual roles and work as a community throughout this situation, we will be able to help alleviate and overcome the crisis that we are facing. It is with sincere compassion that we wish patience, health and good will for all during these uncharted times.
